## EXPERIENCE

### Android Engineer | Soft Host IT

[April 2023 – November 2024]

Developed Android apps using Kotlin, Java, and MVVM. Integrated REST APIs, optimized performance (30% crash reduction, 40% faster load times), and published apps on Google Play. Achieved 20% user engagement growth with Babsayee. Proficient in Retrofit, Espresso, and Agile methodologies. Reduced APK size by 20%.

### Android Engineer | Debuggers Studio

[July 2024 – August 2024]

Built and maintained Android apps using Kotlin and Java. Enhanced app performance, reducing crashes by 25%. Integrated Firebase for analytics and push notifications. Collaborated with designers and backend teams to deliver user-centric features.

### Android Engineer | Arstech

[March 2022 – January 2023]

Developed scalable Android applications with Clean Architecture and Jetpack components. Integrated third-party SDKs and REST APIs for seamless functionality. Improved app load time by 30%. Conducted code reviews and mentored junior developers. Delivered Riklle on time, increasing user retention by 10%.

---

## PROJECTS

### ToDo App | Java, XML, SQLite, etc

[Feb 2022 – Apr 2022]

Developed a task management app with reminders, published on Google Play (10+ downloads)

### Riklle Social App | Java, XML, Firebase, Agora, Stipop, Mapbox, AndroidX, etc

[Mar 2022 – Nov 2022]

Collaborated with Linkhon Ahmed to build a social network app, published on Google Play (10+ downloads).
